

Mason Family Medicine

Telemedicine Services

Don't WAIT until you are sick...allow us to serve as your PRIMARY CARE PROVIDERS !!!

We are now offering Telemedicine services for NEW patients and ESTABLISHED patients who are home bound, working, and traveling.

We have made it easier than ever to connect with our health care providers from the comfort of your home, work office, or while traveling. You can use your smart phone, laptop, desktop, or just a phone call.

You can see one of our providers via Telemedicine for many illnesses and injuries, common health conditions, medication refill, and follow-up appointment in our office.

Our providers are specialized in primary care. We can provide health maintenance, preventative testing, and screening test. We can order blood tests, imaging studies, and proper specialist referral for your health care need. We will follow up with all testing and call you back or have you come in to discuss in person.

We are here to serve you as your Primary Care Providers either via Telemedicine or in our office.

Please call us at **513-492-8541** to make an appointment with one of our providers; you will then be given a link to connect to your provider at the appointed time and date.

PROVIDERS:

Michael Bach MD	Virtual Exam Room: doxy.me/MasonFamilyMedicine
